

SU

Measurement feature	Continuous measurement of large flowrates
Measurement range	1:200
Measurable water	City water, plant water, agricultural water
Meter connection method	Wafer type *1, *2
Body material	Stainless steel pipe
Flow path	Pipe structure

*1: Usable for agricultural water containing little foreign substances.

*2: The 250, 300 and 350mm nominal diameters are the flange (JWWA standard) type.

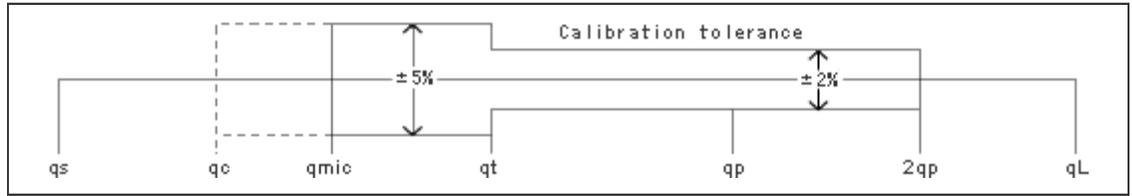

SU Series Overview

Item		Nominal diameter									
		50	65	75	100	125	150	200	250	300	350
Flow-rate range	Max. flow-rate (2qp)(m ³ /h)	60	90	120	180	240	400	600	800	1000	1200
	Standard flow-rate (qp)(m ³ /h)	30	45	60	90	120	200	300	400	500	600
	Transitional flow-rate (qt)(m ³ /h)	6	9	12	18	24	40	60	80	100	120
	Min. flow-rate (qmin)(m ³ /h)	0.9	1.35	1.8	2.7	3.6	6	9	12	15	18
	Min. accurate flow-rate (qc)(m ³ /h)	0.3	0.45	0.6	0.9	1.2	2	3	4	5	6
	Measurement starting flow-rate (qs)(m ³ /h)	0.15	0.23	0.3	0.45	0.6	1	1.5	2	2.5	3
		The meter does not measure a flowrate less than the measurement starting flowrate (qs). The qs to qmin flowrate range is not within the calibration tolerance.									
	Max. limit flow-rate (qL)(m ³ /h)	70	120	160	280	440	650	1100	1140	1140	1200
	The 2qp to qL flowrate range is not within the calibration tolerance.										
Pressure drop at max. flow-rate (MPa)	Not more than 0.02 at the upper limit flowrate of the flowrate range								0.03	0.035	
Working pressure (MPa)	Not more than 2 (Approx. 20kgf/cm ²)('P2' is printed on a register plate.)						Not more than 1 (Approx. 10kgf/cm ²)('P1' is printed on a register plate.)				
Display	Integrating flow (m ³)	999999.999					9999999.99				
	Instantaneous flow-rate (m ³ /h)	999.9					9999				
Meter weight (kg)	3.5	4	5	6	8	10	15	47	68	98	

Item			
Display	No-water warning mark	💧 mark lights	
	Low-battery alarm mark	🔋 mark flickers	
	Measurement stop alarm mark	🛑 mark lights	
Measured fluid	Suitable working temperature (°C)	0 to +30	
	Fluid conductivity rate (µs/cm)	50 or more	
Power supply and battery life	Lithium battery (Nominal 3.6V), battery life approx. 8 years (At average environmental temperature of 20°C)		
Environmental temperature range (°C)	-10 to +55 (The battery life is shortened at higher temperature.)		
Waterproof structure	IP68 (JIS C 0920)		
Piping method	Wafer type (Nominal diameter 250, 300 and 350mm are flange type; JWWA standard flange or JIS 10K standard flange.)		
Meter installation position	Free (Horizontal, vertical and inclined installation are possible.)		
External output	SU-GN type	No external output function (Only field display)	
	SU-GC type	Electronic statement signal for exclusive independent receiver (SR-4 type)	Transmitter: MX35 type
	SU-GM type	Open drain unit pulse signal	Transmitter: MX39 type

	SU-GL type	8-bit electronic statement signal (The signal widely diffused in Japan for water and gas meters), open drain unit pulse signal	Transmitter: MX38 type
