

Switching Power Supply

Switching Power Supply with minimized noise and ripple

■ Features

- Built-in overcurrent protection, output short circuit protection over heating and overvoltage limit circuit(SPA-075/100)
- Standard on safety IEC 60950, IEC 50178
- EMS(Electromagnetic susceptibility) EN61000-6-2
- EMI(Electromagnetic interference) EN61000-6-4
- Output voltage : 5VDC, 12VDC, 24VDC
- Output current : 30W, 50W, 75W, 100W

! Please read "Caution for your safety" in operation manual before using.

Holding time (1)	10ms Min.						5ms Min.	10ms Min.	5ms Min.	10ms Min.		
Inrush current protection	30A Max.(100VAC) 40A Max.(200VAC)	20A Max.(100VAC)						45A Max. (100VAC) /50A Max. (240VAC)	35A Max. (100VAC) /40A Max. (240VAC)	45A Max. (100VAC) /50A Max. (240VAC)	35A Max. (100VAC) /40A Max. (240VAC)	
Output overcurrent protection (3)	110% Min.											
Output over voltage protection							6.5V $\pm 10\%$	16V $\pm 10\%$	30V $\pm 10\%$			
Over shortcircuit protection	5ms Max.						10ms Max.	5ms Max.	10ms Min.	5ms Max.		
Output indicator	Green LED											
Insulation resistance	Min. 100M Ω (Between all input and output terminals with 500VDC)											
Dielectric strength	For 1 minute at 3.0kVAC 50/60Hz(Between all input and output terminals)											
	1 minute at 1.5kVAC 50/60Hz(Between all input terminals F.G.)											
Vibration	0.75mm amplitude at frequency of 10 to 55Hz in each of X, Y, Z directions for 2 hours											
Shock	300m/s ² in X, Y, Z directions for 3 times											
Electromagnetic susceptibility	EN61000-6-2 Appropriate											
Electromagnetic interference	EN61000-6-4 Appropriate											
Protection	IEC60950, IEC50178 Standard											
Ambient temperature	-10~50°C	-10~40°C	-10~50°C	-10~40°C	-10~50°C	-10~40°C	-10~50°C					
Ambient operating	25 ~ 85%RH											
Storage temperature and humidity	-25 ~ 65°C / 25 ~ 90%RH											
Approval	CE											
Unit weight	Approx. 350g						Approx. 400g					

(1)It is when the rated input voltage is 100VAC, 100%.

(3)It is when the rated input voltage is 100VAC.

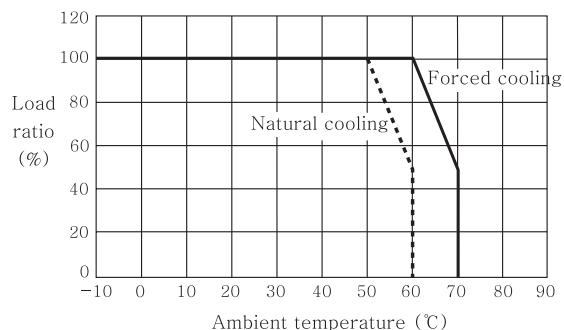

(2)SPA-030/050 series : It is when the rated input voltage is 100~240VDC, 100%.

SPA-075/100 series : It is when the rated input voltage is 100~120VAC/200~240VDC, 100%.

Switching Power Supply

■ Feature data of overcurrent protection

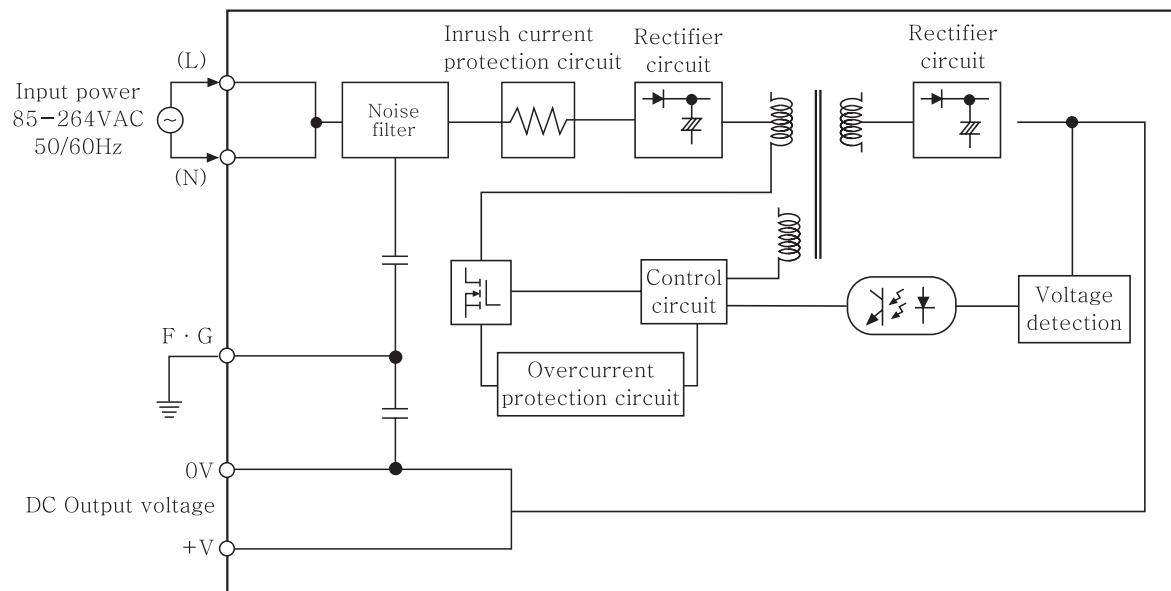

- It is when the rated input voltage is 100VAC, 100%.
- It is able to protect overcurrent by load with built-in overcurrent protection circuit.

When the over rated current is flowed, the circuit is operated (Output voltage is fallen.) and it is cancelled when the load current is under the rated current. (It is returned to the rated output voltage.)

Proper Usage

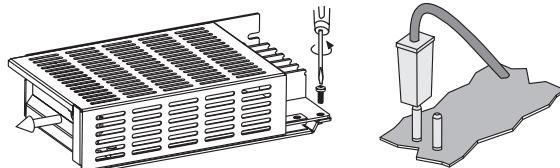

1. Technical information of operation

- ① This product is not available to operate of output voltage as parallel and series.
- ② The output current should be used within the rated range. When it is operated in overcurrent status, the life span of product can be shortened.
- ③ The output voltage should be used within the rated range. When the output overvoltage limit function is operated, the product operated normally with cancellation of input power for few minutes.
- ④ The overvoltage limit function is operated when it is exceeded the rated output voltage range with an output voltage adjustment volume.
- ⑤ This product has over heating protection function. It is operated normally when releasing the load connection for few minutes.
- ⑥ The power factor is within 0.5~0.7 using condenser rectified method. Please use the below formula and check the input power capacity when using a cabinet panel or transformer.

$$\text{Apparent power [VA]} = \frac{\text{Active Power [W]}}{\text{Power factor} \times \text{Efficiency}}$$

- ⑦ This product does not have harmonics suppression and power factor correction circuit.
Please mount the device for it.
- ⑧ This product has a noise filter, it can be changed with the mounting place and connection.
- ⑨ Please change as a same rated fuse when the inner fuse is broken.

- ⑩ The input voltage is 220V for factory default of switching method. When it is switched as 110V, please detach the case as below and select the switch properly.

2. Caution for mounting

- ① Please mount the device on metal panel for the reliability.
- ② Please mount the device in a ventilative place for high radiation of heat.

3. Please use the power line as below specification.

Input power line specification	AWG19 ~ 21	AWG16 ~ 18
Model	SPA-030-05 SPA-030-12 SPA-050-12 SPA-075-12 SPA-030-24 SPA-050-24 SPA-075-24 SPA-100-24	SPA-050-05 SPA-075-05 SPA-100-05 SPA-100-12
